

Cranbury Needs a New Public Library

The new facility will be both a library and a community center that will deliver an expanded range of resources and services for citizens of all ages in a flexible, comfortable space.

The pressing need

- The current combined school/public library does not adequately meet the needs of the school or the town.
- More space is needed to provide resources and services that fulfill the needs of Cranbury's citizens and organizations.
- The town needs a large community space to gather.

Evidence of the need

- Programming for adults and children is limited by lack of space.
- Community groups who request meeting rooms are repeatedly turned away due to space shortage.
- The school limits public access to the children's collection during school hours.
- Acquisition of books, media and materials is limited by lack of space.

Benefits to the community

- A modern, free-standing library will be a community living room that welcomes everyone to a place that encourages reading and life-long learning.
- A new library will help keep Main Street vital by bringing people to shops, restaurants, and businesses.
- A high-quality library is a proven enhancement to property values.

The people who can make it happen

- The library staff is regularly acknowledged by state and national library organizations to be at the leading edge of innovative library services.
- Committed Board and Foundation members have passion and a vision for the future library and its enhanced contributions to the community.

Help us to give Cranbury the library our community deserves.
